

Abstract

A cellular telephone capable of transmitting a picture is disclosed. The cellular telephone comprises a digital camera capturing the picture; a control circuit coupled to the digital camera, the control circuit enabling the storage of the picture; a
5 memory coupled to the control circuit; and a border stored in memory, the border being applied to the picture to surround the picture. A method of displaying a picture on a cellular telephone is also disclosed. The method comprises the steps of providing a digital camera on the cellular telephone for capturing a picture; storing a border in a memory of the cellular telephone; and coupling a border to a picture.
